

101C Modular Enclosures

101C

101C Modular Enclosures are a rear loading, low cost alternative to meet your centralized mail delivery needs. The 101C Freestanding Modular Enclosures are a durable and secure system that can provide mailboxes, parcel lockers, mail and parcel drops, as well as stamp machines and currency changers in both indoor and outdoor environments. Various configurations and model options offer the flexibility required to outfit almost any centralized mailing application. Versatility, high security, and extremely low maintenance requirements are just a few of the features of these mini postal stations.

STANDARD FEATURES

- Constructed of 16 GA Vinyl Clad Steel
- High Security
- Accepts a Multitude of Postal Equipment
- Easy Installation
- Indoor and Outdoor Applications
- Low Maintenance
- Double Deadbolt Keyed Alike

OPTIONS

- 24" or 36" Door Unit
- Custom Configurations
- Storage in Rear of Unit

HOW IT WORKS

101C Units are bolted together to create a wall. (The number of units used in the wall depends on the number of openings desired.) This wall can then be shaped in any configuration to fit the allotted space for the enclosures. The enclosure can be a stand alone station (see "A" models), or can be used in conjunction with an existing wall (see "B", "J" and "L" models). This creates a locked room that the postal carrier enters to distribute the mail. Lights and a security screen roof are included for extra security.
